

# Windows® 7:

# DEPLOYMENT SERVICES

A Windows® 7 deployment impacts every aspect of your organization. To ensure the roll out is smooth and effective, IT leadership requires a consistent, repeatable deployment process. Deployment resources need to be ready to perform required tasks, lessons learned should be gathered and disseminated across each site and logistics management must be prioritized to get the job done right.

By partnering with an experienced IT Deployment Services partner, organizations looking to implement Windows® 7 can mitigate the inherent risks, maintain employee productivity and achieve the anticipated ROI.

## Why Choose TEKsystems Deployment Services

- ▶ **Project Management:** TEKsystems PMI-certified Project Managers are experts in deploying technology, ensuring work is completed correctly, as well as on time and within budget. Our documented project management lifecycle follows the PMI-based Unified Project Management Methodology (UPMM) so we can consistently deliver desired business results.
- ▶ **Logistics Control:** TEKsystems offers a global footprint, the ability to scale thousands of resources up or down and unparalleled logistics control for your deployment. With a focus on planning, workforce sourcing and onboarding, quality control practices, and performance reporting, our full time management team ensures that the right people are in the right place doing the right things at the right time.
- ▶ **Activity Monitoring:** To ensure we stay on schedule TEKsystems assigns Team Leads at each site, reporting into the Project Manager. We implement multiple, daily checkpoints to validate progress, as well as a day's end check out to capture lessons learned and determine ongoing improvement opportunities. Additionally, TEKsystems employs a risk mitigation process to identify potential roadblocks, concurrent with the development of quality plans to address potential issues.

## About TEKsystems® Deployment Services

TEKsystems Deployment Services include install / de-install; moves, adds and changes; and upgrades and software migrations for desktop, laptop and POS systems. With a team of 2,000 people, including PMI-certified leaders, TEKsystems Deployment Services Practice has successfully delivered over 1,000 projects and 38,000 client requirements since 1997, while maintaining a customer satisfaction score 33% higher than the industry average.

TEKsystems was on top of the myriad of changes that could occur during the height of our implementation process. I truly wish there were more [companies] that understand the objectives and goals of the customer.
