

# Windows® 7: EDUCATION SERVICES

An upgrade to Windows® 7 impacts every part of your organization. Users will need to learn how to navigate a dramatically different interface and administrative changes will alter how the system integrates with your network and active directory. As a result, organizations undergoing a Windows® 7 launch are bound to experience increases in help desk calls, lower resolution rates and a steep learning curve within the employee population.

By partnering with an experienced IT services provider, organizations looking to deploy Windows® 7 can mitigate the inherent risks, maintain employee productivity and achieve the anticipated ROI.

## Why Choose TEKsystems Education Services

- › **Overall Learning Strategy:** TEKsystems considers your entire user population to design a comprehensive learning strategy that addresses the needs of each impacted stakeholder. Staggered timelines based on need and priority also offer learning flexibility to get the right information to the right people at the right time.
- › **High Quality Instructors:** The quality of your instructors greatly impacts the quality of your learning program. TEKsystems offers well qualified instructors who average 10 years of experience with the technology, including five years of classroom experience. Moreover, TEKsystems instructors had access to the Windows® 7 beta two years before it was released, giving us a marked advantage as it relates to knowledge and subsequent training.
- › **One Size Does Not Fit All:** TEKsystems offers customizable training solutions, based on your distinct needs. Our Learning Consultants evaluate your varied audiences and the features / functions that will be most utilized. We recommend an overarching learning strategy that fits your learning goals. Our offering includes a combination of instructor led, e-learning and virtual delivery models to ensure that learning modalities match and balance your unique needs.

## About TEKsystems® Education Services

TEKsystems Education Services practice provides robust and comprehensive learning and development solutions with three main areas of expertise: tailored and client focused training for IT and business professionals; custom content and curriculum development; and the outsourced administration and management of day to day operations for learning and development organizations. With over 26 years of experience in Education Services and a 93% customer satisfaction rating, we design learning solutions to meet the unique needs of each client.

TEKsystems Education Services has been an excellent business partner in the development of our program, especially with the customization of its materials to fit our specific tools and methodology and timely delivery to meet our tight delivery schedule.
