

DATA-DRIVEN DECISIONS: REOPEN WITH CONFIDENCE

Collect, secure and analyze data for better decision-making

Reopening your businesses amid the COVID-19 pandemic is challenging. You need to effectively manage and analyze large, dynamic and complex sets of data to make smarter decisions on everything from employee wellness to facility preparedness—all while keeping up with rapidly changing local, state and national regulations and guidelines.

You need certainty during these uncertain times. We've got the solution.

Our powerful, end-to-end data analytics solution collects, secures and analyzes data to make more accurate decisions to help ensure the well-being of your employees and customers. Customizable and turnkey, this program integrates disparate data sources into real-time analytics for a holistic view.

With our automated solution, you'll have disparate data sources in a single view to help make better business decisions.

- **Better compliance** with government jurisdictional guidelines and complex reporting mandates
- **Track your employee wellness** in real time with automated monitoring at the local and enterprise level
- **Manage COVID-19 issues** through automated data analytics around hot spots, contact tracing, test scheduling and improved capacity management across facilities
- **Improve your workplace planning** and capacity management across facilities

Mobile App

Secure, opt-in employee wellness tracking via iOS and Android

Customizable Command Center

Provides real-time analytics, dashboards and reporting

Localized Insights

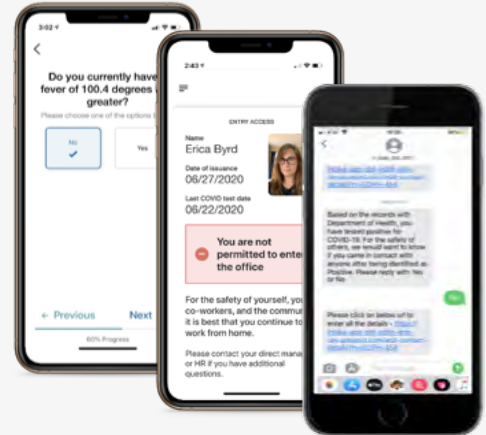

Real-time alerts to local insights such as jurisdictional changes

Reopen Safely with Greater Confidence

Make better decisions with our data analytics solution

REAL-TIME EMPLOYEE WELLNESS MONITORING WITH AUTOMATED CASE MANAGEMENT

Our mobile app is a robust, secure and automated platform for COVID-19 case management. It provides HR teams real-time information to help contact trace impacted employees and report to public health officials. Plus, it's customizable to your needs.

MANAGE EMPLOYEES AND FACILITIES VIA ONE COMMAND CENTER

Comprehensive and customizable—so you can remain in better command of your business. Our data analytics solution has the ability to collect real-time employee wellness data through the mobile app along with third-party data capture depending on your needs. The result? A streamlined dashboard view of your employee and facility well-being.

REAL-TIME ALERTS ON LOCAL CHANGES

Help your on-site teams remain safe and compliant through AI-driven COVID-19 hot spot information aligned to your office locations. Visualize and contextualize the situation with updated jurisdictional guidance by location side by side with local inventory management for critical personal protective equipment and employee case management. Make quicker, more informed resource decisions across regions and in specific locations.
