

TEKsystems supports the Physical and Electronic Security industry with a Portfolio of Services that focused on Building the industry’s workforce

Workforce Development
 Training new resources and developing current talent for the Security Industry.

Talent Services
 Permanent and Temp-to-Perm recruitment to support customers growing headcount needs

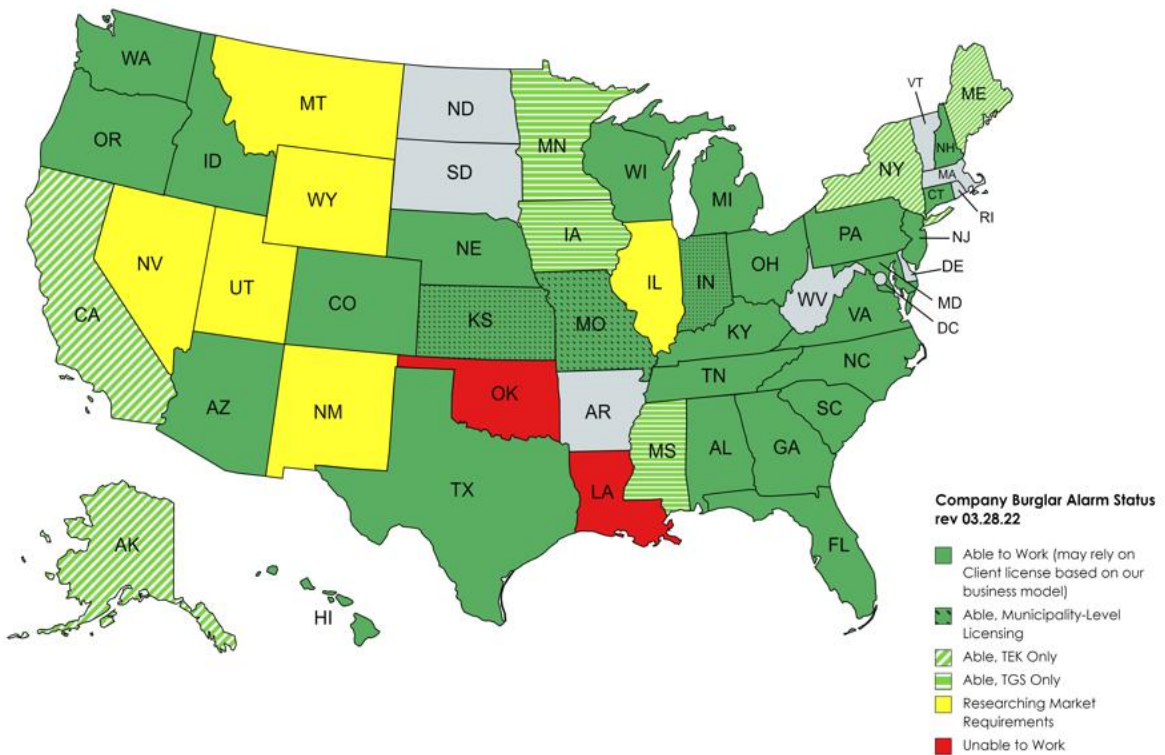

Subcontractor Services
 Complete projects and work orders on a per job basis with TEKsystems dedicated teams of resources

Through nationwide recruitment and a commitment to workforce development we provide teams of resources to support our customers’ projects and help them achieve their revenue goals. We support these projects either as a subcontractor, or by building the client’s workforce internally.

Low Voltage and Security Licensing

TEKsystems maintains licenses and the ability to work in multiple states across the US. We are currently operating in over 34 states providing subcontractor service and sub-labor services. For a list of our licenses use this link: www.teksystems.com/en/lv-licensing
