The Challenge

Cut Through to the Cloud

Cloud-First Transformation, Minimal Disruption

As a leading provider of healthcare IT solutions and services, our customer's number one mission is to improve the health of the communities they serve – connecting communities for a better patient care experience, all while improving the financial operations of their customers.

Our Proposal

Partnership That's Always Tuned In

Comprehensive Transformation from Planning to Best Practices

Successful initiatives are propelled by the right combination of direction and execution. As a Google Cloud Premier partner, we tuned in to understand the customer's full technology stack and provide consulting and advisory support around their migration activities to ensure they were successful – and mitigated risk.

Working together, we helped our customer migrate their infrastructure to GCP, while deploying and scaling containerised applications on Google Kubernetes Engine (GKE).

From design to structure provisioning, we helped our customer plan, build and optimise their GCP environment. Plus, leveraging our cloud and DevOps expertise, we armed our customer with premium best practices for identity access management (IAM) security, GCP networking, autoscaling, containerisation and monitoring.

Powerful Partnership

Geared for Tomorrow, Today

Long-Term Collaboration for Long-Term Results

Helping organisations achieve their goals is our mission. That's why we don't stop at the finish line – we stand ready to continue to partner side-by-side to activate your vision and transform your business.

Empowered by their new Google Cloud environment, our customer had the additional opportunity to leverage Anthos, a modern application platform by Google Cloud. Together, we helped our customer further install and configure Anthos, fuelling greater application modernisation, cloud enablement, and multi-cloud management.

We also provided training and knowledge transfer to our customer team to generate new momentum and build in-house expertise.

Real-World Results

The completed migration to Google Cloud on GKE, with the additional integration of Anthos, is already making significant business impacts for our customer. With our support, our customer successfully deployed multiple workloads into the cloud with minimal customer impact and significantly reduced strain on the organisation's infrastructure.

The result? Fewer connectivity issues and reduced operating costs. Our customer successfully achieved scalability and durability of their new production environment, ultimately driving a cloud-smart strategy built for agility and a progressive, customer-first approach.
